

CODE OF ETHICS

PRINCIPLE

Mothers and their healthcare providers are not given incentives to donate or store.

HEALTH

Donations are only accepted from mothers and babies that pass the health history screening.

SOURCE

Birth tissue donations come from full-term deliveries, not abortions.

PURITY

Donated tissues are tested to meet the highest standards.

CONSENT

Informed consent is obtained when mothers are not under the influence of anesthesia, drugs or in active labor.

TRACEABILITY

Mothers are assigned a unique ID # that is traced through the entire process of enrollment, health history and collection.

TRANSPARENCY

We clearly communicate and explain to mothers how their donation could be used.

CREDIBILITY

Donated birth tissue will only be sent to reputable biorepositories, research laboratories and manufacturers.

ACCESSIBILITY

Parents can withdraw privately stored stem cells for any therapy performed by a licensed doctor.

CONFIDENCE

Our storage facility complies with the highest standard of cryopreserving and redundancy.
